Introduction

The College of Medical Radiation Technologists of Ontario (CMRTO) regulates medical radiation technologists working in Ontario. The CMRTO is responsible for protecting the public by ensuring that all registered medical radiation technologists in Ontario are qualified to practise and are practising professionally.

To practise as a medical radiation technologist in Ontario, you must register with the CMRTO. You may not use the title “Medical Radiation Technologist” or the abbreviation “MRT” without being a member of the CMRTO.

Medical radiation technologists work in health care facilities, including hospitals, clinics and cancer centres. There are four specialties for medical radiation technologists: Radiography, Radiation Therapy, Nuclear Medicine and Magnetic Resonance.

Registration Requirements in Ontario (current as of December 2011)

To get a Certificate of Registration as a medical radiation technologist in Ontario you must meet the requirements that are set out in the CMRTO's registration regulation. The regulation requires that:

Language Fluency	<ul style="list-style-type: none">• you are fluent in English or French. See the section on Language Assessment for more details.
Citizenship	<ul style="list-style-type: none">• you are a Canadian citizen, a permanent resident of Canada, or authorized under the <i>Immigration and Refugee Protection Act (Canada)</i> to practise medical radiation technology in Canada.
Health & Good Conduct	<ul style="list-style-type: none">• your past and present conduct will lead the CMRTO to believe that you:<ul style="list-style-type: none">i will practise medical radiation technology with decency, honesty and integrity, and follow the law,ii do not have any quality or characteristic, including any physical or mental condition or disorder, that could affect your ability to practise medical radiation technology in a safe manner, andiii will display an appropriately professional attitude.
Past Offences & Findings	<ul style="list-style-type: none">• you provide details regarding any finding of guilt for a criminal offence or an offence related to the regulation of the practice of medical radiation technology.• you provide details regarding any current investigation involving an allegation of professional misconduct, incompetency or incapacity in Ontario in relation to another health profession, or in another jurisdiction in relation to the profession or another health profession.• you have not been the subject of a finding of professional misconduct, incompetency or incapacity in relation to medical radiation technology or another health profession, either in Ontario or in another jurisdiction.• you are not currently the subject of a proceeding involving an allegation of professional misconduct, incompetency or incapacity in relation to the profession or another health profession, either in Ontario or in another jurisdiction.
MRT Education	<ul style="list-style-type: none">• you prove that you have completed a medical radiation technology program offered outside Ontario that is considered by the Registration Committee to be substantially similar to, but not equivalent to, an approved Ontario program in medical radiation

	technology.
Evidence of Competence	<ul style="list-style-type: none"> • you prove that you are competent to practise as a medical radiation technologist.
Registration Exam	<ul style="list-style-type: none"> • you pass the examination approved by the CMRTO Council in the specialty in which you have applied for registration.
Evidence of Practice	<ul style="list-style-type: none"> • you show that you have practised as a medical radiation technologist in the specialty, or completed a medical radiation technology program within the five years immediately preceding the date of your application.
Jurisprudence Course	<ul style="list-style-type: none"> • you successfully complete a course in jurisprudence set or approved by the CMRTO.
Fees	<ul style="list-style-type: none"> • you pay the application fee and evaluation fee. • you pay the annual registration fee.

You must satisfy these requirements in the same specialty for which you apply. If you wish to apply to the CMRTO in more than one specialty, you must complete separate application forms, and submit the application and evaluation fee, for each specialty.

Labour Mobility Requirements

If you have completed a medical radiation technology program offered outside Canada AND you already hold a certificate of registration in the specialty of medical radiation technology in another regulated province of Canada, you must meet the following registration requirements:

- you must provide an in-good-standing certificate or letter from the out-of-province regulator of every jurisdiction where you are currently registered as a medical radiation technologist in Canada. The in-good-standing certificate must establish, to the satisfaction of the CMRTO, that you are in good standing as a medical radiation technologist in your specialty.
- you must have engaged in the practice of the specialty or completed a medical radiation technology program within the five years immediately before your application.
- you must pay the annual fee required by the by-laws.

Application Process

Timelines Associated With Applications Referred to the Registration Committee

All completed applications are reviewed by a panel of the Registration Committee at their scheduled meetings. You will receive a letter to give you notice that your application is being referred to the Registration Committee at least 35 days before the date of the next meeting.

The CMRTO's Registration Committee meets every six to eight weeks. Each application is reviewed at least twice by a panel of the Registration Committee. At the first meeting, the panel will review the application and make a decision. At the second meeting, the panel will review, approve and issue the decision of the panel with an Order for any outstanding requirements and a detailed description of the Reasons for their decision.

It takes approximately three to four months from the submission of a completed application to the CMRTO to the time that you will receive the final decision of the Registration Committee.

If the Registration Committee approves your application, you can expect to have five years from the last or most recent date of your employment as a medical radiation technologist to complete all the requirements to become registered.

Timeline for Applications Referred to the Registration Committee

Before You Immigrate to Canada

Before you come to Ontario, contact the CMRTO by email, phone, fax or mail and request an **Application for Registration as a Medical Radiation Technologist for a person who has completed an educational program outside Canada**. You may also access the application forms online on the [International Applicants page](https://www.cmрто.org/what-we-do/registration/students-applicants/international-applicants/) on the CMRTO website (<https://www.cmрто.org/what-we-do/registration/students-applicants/international-applicants/>)

You may print the application form for your specialty(s), complete the application and submit it with all supporting documents and fees to the CMRTO. The address is listed at the end of this career map.

You can apply for registration with the CMRTO before your immigration application is complete. The CMRTO may permit you to start meeting some of the requirements for registration as a medical radiation technologist before you immigrate to Canada.

When You Arrive in Ontario

If you did not complete and send an application form to the CMRTO before you arrive in Ontario, you must file one when you arrive. Contact the CMRTO to request an **Application for Registration as a Medical Radiation Technologist for a person who has completed an educational program outside Canada** or print a copy of the application form from the [International Applicants page](https://www.cmrto.org/what-we-do/registration/students-applicants/international-applicants/) on the CMRTO website (<https://www.cmrto.org/what-we-do/registration/students-applicants/international-applicants/>). The CMRTO contact information is listed at the end of this career map.

Steps in the Application and Registration Process

When filing an application for registration with the CMRTO, you must submit a completed application form, all the supporting documents, and the application fee and evaluation fee (\$395.50 Canadian) to the CMRTO. The steps to submit an application for registration as a medical radiation technologist include:

Step 1 - Complete the CMRTO Application Form

Print and carefully read and complete the application form specific to your specialty. Click on the name of the form that applies to you to access it directly from the career map or access the form on the CMRTO website by visiting the links below:

[Radiography application](https://www.cmrto.org/resources/forms/intl-app-radiography); form available at <https://www.cmrto.org/resources/forms/intl-app-radiography>

[Radiation Therapy application](https://www.cmrto.org/resources/forms/intl-app-radiation-therapy); form available at <https://www.cmrto.org/resources/forms/intl-app-radiation-therapy>

[Nuclear Medicine application](https://www.cmrto.org/resources/forms/intl-app-nuclear-medicine); form available at <https://www.cmrto.org/resources/forms/intl-app-nuclear-medicine>

[Magnetic Resonance application](https://www.cmrto.org/resources/forms/intl-app-magnetic-resonance); form available at <https://www.cmrto.org/resources/forms/intl-app-magnetic-resonance>

Step 2 - Submit the Application Form to the CMRTO

Submit the application form to the CMRTO with the application fee of \$113.00 (\$100.00 fee, \$13.00 HST) and the evaluation fee of \$282.50 (\$250.00 fee, \$32.50 HST). Please attach a completed [Credit Card Payment Form](#), (which is available on the CMRTO website) cheque or money order in Canadian funds for the application fee and evaluation fee of \$395.50, made payable to the College of Medical Radiation Technologists of Ontario (CMRTO). If your application does not include the applicable fee, the application for registration will not be accepted and will be returned to you. The application and evaluation fees are non-refundable.

Step 3 - Provide documentation to support your application for registration

You are required to submit documentation to provide:

- proof that you have completed an educational program in medical radiation technology in your specialty. You must provide:
 - a notarized copy of your degree, certificate or diploma, or provide an original letter from your educational institution confirming successful completion of your program
 - an original or notarized copy of your academic transcript of marks from your educational institution
 - if your documents are not in English or French, you must provide an official translation
- detailed information about the educational program that you have completed in medical radiation technology in your specialty. You must provide the official curriculum or course outline from your educational institution for your program at the time you were enrolled in the program. The curriculum should:
 - contain a detailed list of the courses and a description of the content of each course completed during your theoretical training
 - contain the amount of time spent in both the theoretical and clinical components in hours, days or weeks
 - be certified by the educational institution or your professional association
 - if your documents are not in English or French, you must provide an official translation
- detailed information on the clinical/practical training you completed as part of your

educational program or internship:

- this information may be from your educational institution or training hospital
 - it should include such details as the qualifications of your clinical supervisor(s), the types of hospital(s) or clinical setting(s), the types of procedures completed, and the types of equipment used during your clinical training
- confirmation of your clinical competence in medical radiation technology in your specialty, including:
 - the list of procedures which you have performed,
 - the date you last performed them, and
 - signed confirmation from your supervisor
- a letter from your present or previous employer confirming your employment in medical radiation technology within the last five years, including the date of your last day of your employment as a medical radiation technologist in your specialty
 - proof of language fluency in English or French, if available, or proof that your training was completed in English or French. If your professional training was not in English or French, you must show other proof of language proficiency. The Registration Committee will accept proof that you have passed any of the following and this may be submitted with the application form **or later on in the registration process**:
 - the internet-based (iBT) TOEFL (Test of English as a Foreign Language) with a minimum total score of 73, and a minimum score of 21 in speaking; or
 - the paper-based TOEFL with a minimum score of 500, and TSE with a minimum score of 40; or
 - the IELTS (International English Language Testing System) test – academic (AC) with a minimum overall score of 6 and a minimum score of 6 in speaking; or
 - the IELTS (International English Language Testing System) test – general training (GT) with a minimum overall score of 6 and a minimum score of 6 in speaking; or
 - the MELA (Michener English Language Assessment) test with a minimum score of 8 in each of reading, listening and speaking and a minimum score of 7 in writing
- a copy of your certificate or licence showing that you are a medical radiation

technologist in your country, if available

- a copy of your proof of Canadian citizenship, landed immigrant papers, permanent resident card, or employment authorization (work visa), or appropriate documentation, which **may be submitted with the application form or later on in the registration process**

To help you prepare your application, a [Documentation checklist](https://www.cmrto.org/what-we-do/registration/students-applicants/international-applicants/documentation-checklist) is attached to this document and is available on the CMRTO website at <https://www.cmrto.org/what-we-do/registration/students-applicants/international-applicants/documentation-checklist>.

If you are not able to provide the original or notarized copy of your credential(s), or your academic transcript(s) of marks, or an official curriculum of your program(s), the Registration Committee of the CMRTO may accept other evidence, such as an original letter from your educational program, depending on the circumstances. Please contact the CMRTO if you are unable to provide the original or notarized copies of any of your documents.

The CMRTO reviews all application forms received to ensure that they are complete. The CMRTO will contact you after reviewing your Application for Registration form and the documentation you have submitted, to inform you of the next steps.

The CMRTO will retain all copies of documents provided with the application. Applicants may request copies of their documents by submitting a request in writing to [International Applications](#) in the 'Contact Us' section of the CMRTO website at www.cmrto.org.

Step 4 - Assessment Process

All applications from internationally educated medical radiation technologists must undergo an assessment process. This means that the CMRTO reviews the educational training and experience in medical radiation technology that you may have from another country to see if it meets the requirements for registration with the CMRTO. The steps in the assessment process are described in the next section.

The CMRTO reviews all application forms received to ensure that they are complete. If you completed your education in medical radiation technology outside of Canada, your complete application will be sent to the Registration Committee for review and a decision regarding your application for registration. You will receive a letter at least 35 days before the next Registration Committee meeting notifying you that your application has been referred to the Registration Committee which explains the reasons why your application has been referred. If you have any new or additional information at that time, you will have 30 days to submit it to the Registration Committee.

All complete applications are reviewed in detail by a panel of the Registration Committee.

The Registration Committee meets every six to eight weeks. Each application is reviewed at least twice by the panel. At the first meeting the panel will review the application to make a decision. At the second meeting the panel will review, approve and issue the decision of the panel with an Order for any outstanding requirements and a detailed description of the Reasons for their decision.

Once the Registration Committee has approved the Decision, Order and Reasons, you will receive a letter to inform you of the decision and provide you with a copy of the Decision, Order and Reasons. The Decision, Order and Reasons will list any outstanding requirements you must meet (Order) and will clearly explain the Reasons for the Registration Committee's decision. You will also be informed of your right to contact the Health Professions Appeal and Review Board to appeal the decision of the Registration Committee if you do not agree.

If you meet all the registration requirements of the CMRTO, you will be able to continue with the registration process. If you do not meet the requirements of the CMRTO, the Registration Committee has the authority to refuse to issue you a Certificate of Registration.

Usually it will take approximately three to four months from the time that your application for registration is accepted by the CMRTO as complete to the time that you will receive the final decision of the Registration Committee.

If the Registration Committee approves your application, **you can expect to have five years from the last date of your employment as a medical radiation technologist to complete all the outstanding registration requirements.** For example, if you last worked in January 2015 as a medical radiation technologist, you can expect that you will have to complete all the registration requirements and be registered by January 2020.

Academic Credentials Assessment

In order to meet the academic requirement, you must show the CMRTO that you have completed a program in medical radiation technology in your specialty that the Registration Committee would consider to be substantially similar to an approved Ontario program.

- If you trained outside of Canada you must send a notarized copy of your degree, diploma or certificate, or provide an original letter from your educational institution confirming successful completion of the program.
- You must also provide an original or notarized copy of your academic transcript of marks and a detailed curriculum or course outline for your program that is certified by the educational institution or professional association. Your curriculum or course outline should contain a detailed list of the courses and a description of the content of each course that you completed during your theoretical training and identify the amount of time spent in both the theoretical and clinical components (in hours, days or weeks).
- You must also provide detailed information on the clinical training you completed as part

of your educational program or internship. This information may be from your educational institution or training hospital. It should include such details as: the qualifications of your clinical supervisor(s), the types of hospital(s) or clinical setting(s), the types of procedures completed, and the types of equipment used during your clinical training.

- If your program required you to first complete another post-secondary educational program or courses prior to entering the program in your specialty (e.g. a Bachelor of Science, a medical radiation technology program in another specialty, or prerequisite college or university courses or credits) you must also attach a notarized copy of your certificate, diploma or degree, or an original or notarized copy of your academic transcript, or provide an original letter from your educational institution confirming that you obtained a certificate, diploma or degree in another specialty of medical radiation technology or other field of study. You must also provide a detailed curriculum or course outline for the prerequisite program or courses, certified by the educational institution or professional association.

If you are not able to provide the original or notarized copy of your credential(s), or your academic transcript(s) of marks, or an official curriculum of your program(s), the Registration Committee of the CMRTO may accept other evidence, such as an original letter from your educational program, depending on the circumstances. Please contact the CMRTO if you are unable to provide the original or notarized copies of any of your documents.

Based on the documents you provide with your application, the Registration Committee will review your educational program to determine if it is substantially similar to, but not equivalent to, an approved Ontario medical radiation technology program in your specialty. In the past, the Registration Committee has considered the following in its assessment of educational programs:

1. The program credential achieved: for example, a degree or diploma in radiography (radiological technology), radiation therapy, nuclear medicine or magnetic resonance.
2. The level of the educational program: for example, at a post-secondary college or university.
3. The nature and content of the theoretical training: for example, anatomy and physiology, radiation physics and safety, patient care, clinical oncology, image evaluation and optimization, imaging equipment theory and operation, etc. Further details specific to your specialty on the nature and content of theoretical training can be found in the application form for your particular specialty.
4. The nature and content of the clinical training: for example, the procedures an applicant was trained to perform, the qualification of his or her supervisor, the types of clinical settings, the types of equipment, etc.

5. The depth and breadth of the program: for example, the length of the program, the number of hours spent in theoretical training, the number of hours spent in clinical training.

Clinical Competence Assessment

If you completed a program in medical radiation technology outside of Canada, the registration regulation requires you to demonstrate to the CMRTO that you are competent to practise in Ontario as a medical radiation technologist in your specialty. The CMRTO application form includes a **Certificate of Clinical Competence** which provides a detailed list of all the procedures for each specialty. You must list in detail on the application form all the types of procedures that you have performed during your most recent or current employment.

To confirm that you are competent in those procedures, and that your written certification is correct, your direct clinical supervisor in your most recent or current place of employment must read and sign the section called **Validation of Clinical Supervisor**. Your direct clinical supervisor must be either a medical radiation technologist, radiologist or radiation oncologist who supervised your daily procedures.

The Registration Committee will assess your competence to practise based on the details described in your application form. In the past, the Registration Committee has considered the following in its assessment of an applicant's competence to practise, whether:

- the list of procedures that an applicant has performed is similar to those performed by medical radiation technologists in the specialty in Ontario;
- an applicant's direct clinical supervisor has confirmed that he or she has performed the procedures and is competent in the procedures listed; and
- an applicant has performed the procedures listed within the five years prior to the date of the application to the CMRTO.

You must list all the procedures that you completed at your last or current place of employment for the Registration Committee to assess your competence to practise.

You must also provide proof that you have worked as a medical radiation technologist within the last five years. A letter from your last or current employer stating your last date of employment is necessary to meet this requirement.

Step 5 - Complete any remaining requirements to become registered as outlined in the decision of the Registration Committee

These requirements may include one or more of the following: providing proof of language

fluency; providing proof of citizenship, permanent residence or authorization to engage in the practice of the profession (e.g. a work permit); completing the jurisprudence course set or approved by the College; passing the CAMRT exam; and paying the annual fee.

Jurisprudence Course

You are required to have successfully completed a course in jurisprudence set or approved by the CMRTO. To do this, you must complete the [CMRTO Legislation Learning Package](#) and review the appropriate statutes, regulations, policies and guidelines which relate to the practice of medical radiation technology generally and to the specialty for which you are applying.

You may complete this requirement now or after the Registration Committee has assessed your educational program(s) and experience in medical radiation technology.

The Legislation Learning Package and the legislation, policies and guidelines are available on the CMRTO website at www.cmrto.org at <https://www.cmrto.org/resources/legislation-regulations-by-laws/jurisprudence/>. Once you have completed the Legislation Learning Package and reviewed the appropriate statutes, regulations, policies and guidelines, you will need to print, complete, sign and date the [Certificate of Completion](#) and submit the signed certificate to the CMRTO. You may access the Certificate of Completion on the CMRTO website at <https://www.cmrto.org/resources/legislation-regulations-by-laws/jurisprudence/certificate-of-completion>. A copy of your proof of Canadian citizenship, landed immigrant papers, permanent resident card, or employment authorization (work visa), or appropriate documentation, **may be submitted with the application form or later on in the application and registration process.**

Language Proficiency Assessment

You are required to provide proof of your fluency in English or French.

If your professional training was in English or French, send confirmation from your training institution that the language of instruction and assessment in your program was English or French and this will be acceptable as proof of language proficiency. The evidence from your training institution should state clearly that all theoretical and clinical training and the examinations were in English or French.

If your professional training was not in English or French, you must show other proof of language proficiency. The Registration Committee accepts the following:

- the internet-based (iBT) TOEFL (Test of English as a Foreign Language) with a minimum total score of 73, and a minimum score of 21 in speaking; or

- the paper-based TOEFL with a minimum score of 500, and TSE with a minimum score of 40; or
- the IELTS (International English Language Testing System) test – academic (AC) with a minimum overall score of 6 and a minimum score of 6 in speaking; or
- the IELTS (International English Language Testing System) test – general training (GT) with a minimum overall score of 6 and a minimum score of 6 in speaking; or
- the MELA (Michener English Language Assessment) test with a minimum score of 8 in each of reading, listening and speaking and a minimum score of 7 in writing.

Proof that you have passed any of the above tests may be submitted with the application form or later on in the application and registration process. Contact information for TOEFL, IELTS and MELA are listed at the end of this career map.

Work Authorization

You are required to provide proof that you are legally allowed to work in Canada. This proof may include one of these options: a copy of your proof of Canadian citizenship, landed immigrant papers, permanent resident card, or employment authorization (work visa), or appropriate documentation. **This may be submitted with the application form or later on in the registration process.**

Step 6 - Write the CAMRT examination

CAMRT National Exam

The CMRTO-approved written examination is the national certification examination of the Canadian Association of Medical Radiation Technologists (CAMRT). Once your application has been reviewed and approved, the CMRTO will notify you if you are eligible to write this examination.

The CMRTO will provide the CAMRT with your contact information and advise the CAMRT that you are approved to write the examination. You must register for the examination directly with the CAMRT in Ottawa following the CMRTO's approval for you to write the examination. The CAMRT certification examination application process must be completed online at the link below.

www.camrt.ca/certification/graduates-of-canadian-accredited-programs/applying-to-write-the-certification-exam/.

The documents related to your certification examination application and preparation including the curriculum guide, competency profiles, the examination blueprints, a list of recommended textbooks and a sample examination are posted on the [CAMRT website](#) at:

www.camrt.ca/certification/graduates-of-canadian-accredited-programs/applying-to-write-the-certification-exam/.

If you require a paper copy, please contact the CAMRT to have the necessary documents mailed to you. Please be advised that you have a maximum of four attempts to successfully complete the CAMRT examination (one initial write and three rewrites) within a five-year time period based on the date you last practised medical radiation technology or completed your program in medical radiation technology, provided you meet the requirements of the Order of the CMRTO Registration Committee by the date determined by the Committee.

The CAMRT National Examination is a multiple-choice exam that will test your knowledge, skill and judgement (competencies) in one of the specialties of medical radiation technology (radiography, nuclear medicine, magnetic resonance or radiation therapy). This exam is four hours long and is offered three times a year at various locations throughout Canada. The CMRTO will also provide you with a letter that will make it possible for you to join the library at The Michener Institute for Education at UHN in Toronto. With that library card, you will be able to borrow the textbooks necessary to prepare for the examination.

As of the date of publication of this document, the Radiological Technology Bridging Program at The Michener Institute for Education at UHN and the Medical Radiological Technology Bridging Program at the Northern Alberta Institute of Technology (NAIT) are available to assist you with skills training, personal support and provide the guidance needed to pass the certification examination and help prepare you to work in Canada. Admission to the Michener's and NAIT Bridging Programs is only available to those applicants who have received a decision from the CMRTO's Registration Committee that states they are eligible to sit the CAMRT examination. Detailed information regarding these programs is available at www.michener.ca/access/ and www.nait.ca/mrtbridging. See the contact information at the end of this career map for information on how to contact these bridging programs.

Step 7 - Provide evidence to the CMRTO that you have passed the CAMRT examination

When you receive notification of passing the CAMRT examination and if you are ready to start work immediately, proceed to Step 8. When the CMRTO receives the list of successful candidates from the CAMRT, and if you have not already contacted the CMRTO, you will be sent a letter outlining the final steps for registration.

Step 8 – Complete the Application Information Update form and pay the registration fee

Complete and fax the [Application Information Update form](#), a copy of your proof of passing the CAMRT examination and a [Credit Card Payment Form](#) to pay for your registration fee. [Contact the CMRTO](#) to find out the amount of your registration fee. The annual fee is \$531.10

(\$470.00 fee, \$61.10 HST), but the initial fee is prorated from the date you become registered to your birthday. Once you have met all the requirements for registration you can expect the registration process to be completed within 10 business days.

Step 9 - Receive confirmation from the CMRTO that you are registered

Once you complete all of the requirements as directed by the Registration Committee within the timeframe required by the Committee, you will be issued a Certificate of Registration and a CMRTO number. You or your employer can confirm your registration status from the [public register of members](#) under the 'Find an MRT' section of the CMRTO website at www.cmрто.org or by [contacting Registration](#).

Step 10 - Start working!

Once you are registered with the CMRTO you are legally authorized to practise the profession in Ontario and can use the protected title appropriate to your specialty - MRT(R), MRT(T), MRT(N), or MRT(MR). You will then be able to work in Ontario as a medical radiation technologist in the specialty indicated on the Certificate of Registration. The Certificate of Registration is proof to the public and your employer that you are authorized to practise as a medical radiation technologist in Ontario. In order to continue practising as a medical radiation technologist in Ontario, you must pay the annual fee on or before your birthday every year. If you have any questions regarding your registration, [contact Registration](#) on the CMRTO website at www.cmрто.org.

Labour Market Information

Registration with the CMRTO is not a guarantee of employment as a medical radiation technologist in Ontario. The CMRTO does not have any information on specific employment opportunities for medical radiation technologists.

In Ontario there are approximately 6,500 registered medical radiation technologists employed in hospitals, private clinics, cancer centres, research laboratories, industry, education and administration. Hospitals, clinics and cancer centres employ medical radiation technologists in all four of the specialties. Very few medical radiation technologists are self-employed.

Many medical radiation technologists work full time, with a forty-hour workweek including weekend, evening, night and standby work. About 20% of all employed medical radiation technologists in Ontario work part-time. Since the mid-nineties there have been a number of part-time, casual and contract positions available.

The average annual salary for a full time medical radiation technologist is approximately

CAN\$69,575.50. The hourly pay for medical radiation technologists ranges from CAN\$31.09 to CAN\$47.27. This is above the average income for all occupations in Ontario.

For information on jobs for medical radiation technologists in Ontario, see the [OAMRS website](http://www.oamrs.org) at www.oamrs.org. For general information on working as a medical radiation technologist in Canada visit the [CAMRT website](http://www.camrt.ca) at www.camrt.ca. The mailing address and telephone numbers for these associations are listed at the end of this career map.

For more information on labour market conditions in Ontario see [Ontario Job Futures](http://www.tcu.gov.on.ca/eng/ojf/index.html) at www.tcu.gov.on.ca/eng/ojf/index.html. In Ontario, labour market information is also available at public libraries in your community or at Employment Resource Centres.

Fees and Costs (in Canadian dollars)

Make cheques, international money orders, or money orders for the application fee and evaluation fee payable to the College of Medical Radiation Technologists of Ontario (CMRTO). If you are paying by credit card, complete the CMRTO's credit card payment form that is available on the [CMRTO website](https://www.cmrto.org/resources/forms/credit-card-form) at <https://www.cmrto.org/resources/forms/credit-card-form>. Your payment for the application and evaluation fees will not be processed until your application is complete. The application and evaluation fees are non-refundable.
