

Your care is our responsibility!

Your medical radiation technologist (MRT) is the regulated health professional who provides you with safe, effective and ethical care during your diagnostic imaging or radiation therapy procedure.

You can expect your MRT to:

- Treat you with dignity and respect
- Provide you with understandable information and answer questions about your procedure
- Explain when, where and why your MRT may need to touch you for the procedure
- Keep all your information confidential and respect your privacy

All MRTs must be registered with the College of Medical Radiation Technologists of Ontario (CMRTO). The CMRTO's role is to protect your interest. For more information go to www.cmrto.org.
